

Multi-Station Bander BM 105

For automatic in-line banding of die-cut packs.

Description of BM 105

The BM 105 multi-station bander is employed with all the LabelSystems that produce square-cut labels. The bander can be loaded from the automatic cutting machine Autocut 115 or 137 Autotrim M. The unloading finger of the automatic cutter pushes the completely cut label row automatically onto the table of the BM 105. After that the row pusher takes the complete label row to the banding device. The completely banded packs are pushed further onto the delivery table from where they can be manually removed for packaging or by a transfer station onto a conveyor belt.

Customer benefits

- // Very easy to handle
- // Integrated into the work cycle it requires no manual handling
- // Excellent performance of up to 90 packs per minute
- // Very flexible thanks to fast conversion without requiring any tools

Technical data

Label size, min.	20 x 43 mm 0.79 x 1.69 in.
Label size, max.	250 x 1,050 mm 9.84 x 41.34 in.
Stack height min.	10 mm 0.39 in.
Stack height max.	125 mm 4.92 in.
Banding stations max.	18
